Dave Nuell - Casting Production Foreman

Ken Fowler - Custom Pattern Construction and Design

For 35 years, MarsKeel Technology has united our passion for sailing with our vast technical experience, supplying quality keels to builders and sailors worldwide.

MarsKeel Technology has supplied custom yacht builders from around the world, from the United States to South Africa and Turkey. These have been many different types of keels from the largest single cast lead keel made in North America to CNC machined lifting keels. We offer our customers complete engineering and design support, full project management as well as the physical range of manufacturing processes, from casting to metal fabrication to complete CNC machining up to 30'. It is our dedication to serving the customer to the very highest level of quality that unifies our team and produces the very best keel systems in the world.

Our commitment to technological advancements and staff dedication has earned us a reputation throughout the industry with designers and builders that is second- to-none.

With over 100 million pounds of castings over three decades, our casting experience and metallurgical knowledge places MarsKeel Technology™ as the worldwide industry leader.
