

# THE EVEN KEEL

Volume 9

October 2000

## AWARD WINNING HUNTER 356

Cruising World Magazine selected the New Hunter 356 as the Best Cruising Production Boat in the under \$200,000 price range. For Mars, with our motto of "Success is Built From the Bottom Up", we knew that the Hunter 356 with the MarsKeel Technology keel system, was a ready made winner. Hunter and Mars have one key characteristic in common. Both companies, over the long term, have provided high quality products that are packed with innovation and value.

The New Hunter 356, designed by Glenn Henderson, is spirited cruiser that is fast and beautifully laid for comfortable over night cruising. With the design of the 356 and its high profile awards, production had to be geared up quickly. Mars excels at rapidly ramping up new keel designs from the drawing board through production, to meet our client's urgent needs.

The 356 has two keel options, the shoal keel (5' high) and the deep draft keel (6' 5" high). Both are constructed of antimonial lead with corrosion resistant 316 stainless steel keel bolts.
